Four summer post offices in the Edmonton district have been closed, according to a circular issued by the district postal superintendent's office. The offices are located at Edmonton Beach, Kapaswin Beach, Ma-Meo Beach, and Aspen Beach.

## ABLE TO SELL AT ANY RATE

Serious concern is being manifested by people in all walks of life in Canada over the low price wheat now prevailing. While the large crop raised has been directly responsible for greater activity in railway and industrial circles the small return to the farmer is most discouraging. The curious feature of the situation is contained in the rather hopeless feeling that it will take some considerable time yet before an upward trend can take place. A year ago there seemed decided indications that price betterment would materialize. Now prices are not nearly so optimistic.

Western Canada is in the midst of the harvest and deliveries at primary points are exceedingly heavy. That, combined with our large carry-over and the heavy supplies in the United States, has a depressing effect on the markets. A gleam of encouragement is seen in the heavy exporting business being done at the present time, the lack of burdensome supplies in other continents outside of North America the comparatively small quantity of wheat afloat, and the high quality of this year's Canadian wheat crop. Australia and Argentina are practically out of the export market now and Russia does not appear to have any surplus to ship this year, so the required supplies must come from North America.

This situation will prevail until the first of next year when new crop wheat from the southern hemisphere will commence to trickle onto the world markets. In the meantime Canada should be able to get rid of a large volume of her wheat supplies and thus have the worse part of her marketing problem solved.

Late in the past summer there was an uneasy feeling throughout the country that a possibility existed of there being no market for much of our wheat crop and that farmers would be unable to sell at any price. Very fortunately that eventually has not been reached, even at the peak load of deliveries. Prices are unreasonably low, it must be admitted, but at least there is some slight satisfaction that a more alarming situation has not arisen. — Calgary Herald.

## BRITISH TRAIN SETS NEW MARK

London, Eng.—With a view to speeding up train times to the limit the London, Midland and Scottish Railway Company got to work in the style on the winter train services and no fewer than 1,075 trains have been accelerated by a total of 3,660 minutes daily. Under the new timetables there are five London, Midland and Scottish expresses scheduled to make daily runs at average speeds of more than 60 miles an hour, including one at 64.4 miles an hour, and another at 63.1 miles an hour, while eighty-one other trains will be timed at average speeds ranging from 55 or 59 miles an hour.

Seattle Sept. 30—Pieces of the battered hull of the freighter Neda, pounded Friday on a rocky Aleutian island where 34 members of her crew were drowned by stormy seas. Only three men survived, saved by their own strength and daring and the heroism of lifeboat crews from two rescue ships.

For many months the squirrels and chipmunks have had the freedom of its shelter. Claw marks on the doorpost are in the nature of a visiting card left by Mr. Bear. Deer have gazed on it questioningly, and in the clearing to the west of the cabin tattered bunnies have kept a wary eye as they hopped about on their own affairs. For long it has been enveloped in the silence of the north woods, a quiet hush made more noticeable by being broken occasionally by the whirr of a partridge, the weird laugh of a loon on the nearby lake, or the plaintive calls of the whip-poor-wills as evening closes in. Hark! Far down the lake sounds the exhaust of an outboard motor, carrying to the invisible inhabitants of the point the message that the owner of the camp will shortly take possession and that the hunting season has arrived.

There are many cabins such as this in the vast Canadian forest zone which stretches across the continent from Nova Scotia in the east to British Columbia in the west. In

## LOWEST LIVING COSTS SINCE 1917

Compared with the 1926 dollar, today's dollar will purchase \$1.55 worth of goods, according to the latest in the series of consumer studies being conducted by Investors Syndicate of Minneapolis.

The decline in prices, the study finds, has brought about interesting changes in the family budget. The result is that living costs, expressed in dollars, are the lowest since 1917. Food costs about the same as in 1913, clothing sells for 1916 prices and rents are down to 1919 levels.

Thus, for consumers who have been living on a fixed income during this period, such as government employees, people living on trust funds or incomes from good investments, the decline in prices has really increased the purchasing power of their incomes by more than one-half since the depression began.

Lord Bessborough, governor general of Canada said on his return to Ottawa that his tour in the west had been a revelation to him, particularly as regards the spirit of confidence and determination that he found among the people.

## ALBERTA CAN BECOME SELF-SUPPORTING IN OIL DECLARES REID

Edmonton, Sept. 29—Commenting on the recent highly important developments at the McDougall-Segur well in Turner Valley, where high-grade crude oil has been found at 2,360 feet, Hon. R. G. Reid, minister of lands and mines declared Wednesday that there was no question that Alberta could become self-supporting in the matter of crude oil production from the different fields already proven, without depending on unknown areas yet to be discovered.

"The government is, always has been prepared to encourage in every way possible, the development of crude oil production," said Reid. "This is the more valuable resource and does not involve such tremendous wastage of natural gas as has attended the production of naphtha."

Petroleum imports into Alberta today, Reid pointed out, were at the rate of 1,500,000 barrels yearly. Added to this was the actual production from Turner Valley, Red Coule, and Wainwright fields of more than 1,000,000 barrels a year, which

showed a visible demand of 2,500,000 barrels yearly for home consumption. Home production, therefore, stood at 150 per cent short of home demand.

BRITAIN'S REAL LEADERSHIP

Great Britain has certain elements of stability, which we lacked, to meet a financial crisis. There had been no preceding and extravagant prosperity to drop from and no weakly spread out banking system to contribute its thousands of failures. Yet, in 1931, alarming depths of financial crisis were reached just the same. That much of the recovery has been psychological, that the increases have been in courage and confidence rather than in tonnage figures, are not to be deprecated.

What Great Britain has proved is that "something can be done" and that real leadership in the world is not lacking. It has demonstrated that old-fashioned patriotism is still a powerful and virile force.—Satur-

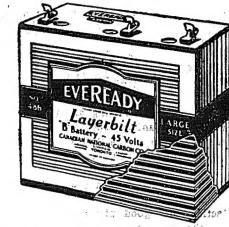

day Evening Post.

A group of Alberta and Saskatchewan young people will establish a communal colony at Sooke, Vancouver Island, on straight socialist principles.

## PARLIAMENT OPENS ON THURSDAY; STRENUOUS SESSION IN PROSPECT

Ottawa, Oct. 1.—While Parliament Hill anticipates that the session which is opening on Thursday next will be long, it is not expecting that Hill is that there is no telling how it will be in the slightest degree tedious.

The topics and problems which already stand definitely upon its agenda, Imperial conference, railroads, railway legislation, Bank Act revision term, unless some unforeseen developments intervene, trusting that sufficient assurance that at no time in the interval the Imperial conference agreements will have actually level.

There is the added promise of a agriculture to end the farmer's long bizarre touch to the forthcoming winter of discontent, as well as the debates in the fact that since last mushroom growth of new movement session J. S. Woodsworth, M.P. for men and parties—Calgary Herald.

North Centre Winnipeg, has taken upon himself the status of a party LIBERAL LEADER

DECLARES WAR ON CONFERENCE TERMS

Co-Operative Commonwealth Federation will make Woodsworth more Seaforth, Ontario, Sept. 29.—A volume remains to be seen, but in stormy passage through the House of Commons for the Imperial Conference is seriously doubted. Already he once agreements were forecast in the speech here Wednesday by Right Hon. MacKenzie King. "Mr. Bennett will likely put the conference representatives before the house," he said, "and demand ratification without discussion, and if we don't agree he will apply closure. I propose to have something to say in the house about this high-handed method of doing business. I am going to have something to say to, about this business of one part of the empire interfering with the domestic affairs of another."

Woodsworth will enjoy no added privileges by reason of his new leadership. Only one opposition leader, the head of the largest group is recognized by the House rules and even Robert Gardner, chairman of the Progressives, has no other prerogatives in debate than belong to the ordinary private member. He must conform, for instance, to the 40-minute rule, from the restrictions of which MacKenzie King is free.

While the Co-operative Commonwealth Federation has not availed to

## Don't Allow Unsightly Pimples To Disfigure Your Face

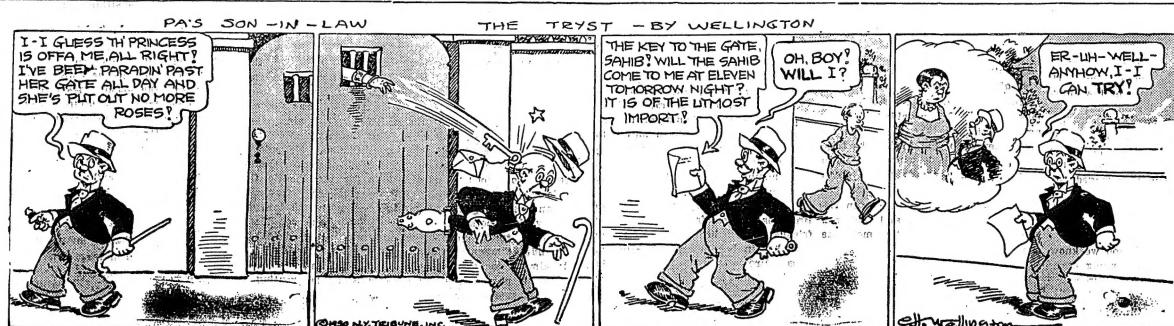

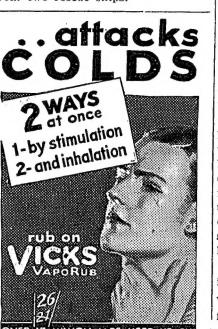

The proper way to get rid of this unsightly skin disease is to go right to the seat of the trouble, the blood, and give it a thorough cleansing by the use of Burdock Blood Bitters. You will then have a smooth, clear complexion.

Mr. H. Shultz, Wooto, Ontario, writes: "Three years ago my face and neck were covered with pimples. The warts were an infliction I abhorred so I used to scratch them which made them worse."

Nothing seemed to help me until I started using Burdock Blood Bitters. After a few bottles I noticed a change, so got another, and in a short time the pimples had all gone."

## Recipe for Making Men

### Ingredients

One red blooded boy  
Parents' loving care  
Outdoor exercise

Some study (not too much)  
Reasonable amount of work  
Good food (plenty of Robin Hood bread)

### Method

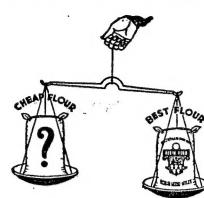

Mix work and play with study. Combine wisely under direction of loving parents. Add muscle building foods... plenty of bread made from Robin Hood flour. Rear with patience and understanding. Turn out at 21, a credit to parents. This recipe makes one man.

**O**NLY a mother knows the painstaking care required to raise a boy. She bears the responsibility of educating him and developing his body from babyhood so that he will be equipped to make a comfortable living. In times like these, mothers have to sacrifice in order to give their children the advantages of a normal youth. They cannot slight the mental and moral training of their children, nor can they handicap the child through lack of good nourishing food. Since bread is essential, smart mothers know how foolish it is to economize on flour when even the best is inexpensive.

Prairie mothers have considered Robin Hood flour the Standard of Excellence for more than a generation. It remains today the flour in which you can put your trust. Robin Hood is CLEAN, PURE and of highest food value. It is the safe flour to use "for making men."

### STUDY THIS PICTURE—THEN THINK

The difference in cost between CLEAN, PURE Robin Hood flour, and CHEAP, poorly milled flour is only 1c PER DAY FOR A FAMILY OF FOUR.

TWO YOUTHS REACH MONTREAL FROM B.C. IN ENGINELESS CAR

Montreal, Oct. 1.—Having traveled from Vancouver through the United States in an engineless automobile, 1915 model, two Pacific coast youths were in Montreal Friday, ready to start the last lap of their 3,000-mile trip to Halifax.

Angus Milne, 22, and William Carmichael, 23, Vancouver, are the two participants in the unique achievement, and they patiently explained that an engine was not essential.

"We were towed," they said in unison.

### WHEAT PRICE SETS NEW LOW RECORD

Winnipeg, Sept. 29.—Wheat, which has been hovering on the brink of the half-dollar mark for several days, crashed through Thursday to 49½ cents for the October future. This is the lowest price known in the annals of the grain exchange here.

The jow of last year was made on the day Britain went off the gold standard. October wheat touched 61 cents Sept. 21, 1931. In the previous year wheat dipped to 50 cents December 27. Prices are now two cents under Chicago.

## Suffered From Heart Weakness Shaky Nerves, Restless Nights

Mrs. A. Blake, Wallacoburg, Ont., writes: "I suffered from heart weakness, shaky nerves, and restless nights."

I saw your advertisement for Milburn's Heart and Nerve Pills and decided to try them although I did not have much faith in them. I am very thankful I did as they have proved of wonderful help to me."

I am now strong and well again, but am never without a box in the house."

For sale at all drug and general stores; put up only by The T. Milburn Co., Limited, Toronto, Ont.

### BELIEVE IT OR NOT—THE GOVERNMENT RECORDS PROVE IT

On February 11th, 1931, there were 101 cars owned by the Brownlee Government. Of this number 31 were American cars.

On February 11th, 1932, the Government owned 106 cars.

Between these two dates 47 new cars were purchased at a cost of \$47,915.83. An average cost of \$1020.00 each. The lowest in price costing \$757.00 and the highest costing \$3953.03.

During the same period 37 cars were sold or disposed of for the sum of \$12,766.25, an average of \$345.00 each. The lowest sold for \$40.00 and the highest one sold for \$1050.00.

There should therefore be 111 cars on hand instead of 106. Where have the other five disappeared to?

The Brownlee Government spent in 1930 \$55,571.53 for repairs and upkeep of government cars. In 1931 they spent \$66,993.12. What are these figures? Incide gas and oil is not clear. In 1930 it cost \$8480.25 to operate the Government garage. In 1931 it cost \$12,294.29.

In 1930 the sum of \$37,539.80 was paid to privately owned garages and repair shops for repairs supplies, gasoline and oil for Government cars. In 1931 the Government paid \$46,052.19 for the same services.

The depreciation on 101 cars in 1930 would amount to \$32,000.00. In 1931 the depreciation on 106 cars would be \$26,500.00.

Repairs are made and work is done on privately owned cars in the Government garage.

Sales of repairs and of oil and gas are also made to private parties and accounts are allowed to run monthly.

During 1930 the services of chauffeurs cost the Government the sum of \$4400.00.

Each Cabinet Minister is supplied with a Government car free of charge for private use as well as public business. They are serviced free and furnished with oil and gasoline at public expense. In addition two extra cars are also at their command.

In February, 1932, the Government was asked the following question: "What was the cost of operating Government cars by each of the Ministers during the year 1931 including gasoline, oil, repairs, storage and all other charges and how many miles did each Minister travel?"

This question still remains unanswered. Why?

This is the automobile record of the Brownlee Government for the years 1930 and 1931 as established by Sessional Paper Reports.

### ROOSEVELT'S PLAN FOR AGRICULTURE

Franklin Roosevelt, in addressing a great Kansas audience, proposed that the speculative activities of the Federal Farm Board must cease.

"Specifically," he said, "I am prepared to insist that federal credit be extended to banks, insurance or loan companies, or other corporations or individuals which hold farm mortgages among their assets—but that these credits must be made on the condition that every reasonable assistance be given to the mortgagors where the loans are sound, with the purpose of preventing foreclosure."

The second immediate necessity, he said, was to provide a means of bringing about through government effort a substantial reduction in the difference between prices of the things the farmer sells and those he buys. He added that one way to attack this was by the restoration of international trade through tariff readjustments.

He said the Democratic tariff policy consisted in large measure of negotiating agreements with individual countries permitting them to sell goods to this country in return for the privilege of selling American goods to them.

As permanent steps in his program the New York governor proposed:

Re-organization of the agriculture department to supply the administrative machinery needed to build a program of national planning.

Formulation of a definite policy looking to the planned use of land, to determine which is best suited for agricultural production and which for trees.

National leadership in the reduction and more equitable distribution of taxes including a national movement to deorganize a local government to direct the elimination of some of the tax burden from the farms.

His emergency proposals called for refinancing farm mortgages "to relieve the burden of excessive interest charges and the grim threat of foreclosure."

You would not be ashamed of your stationery if it had been printed at The Times office.

### CONSERVE CREDIT

Farmers are faced by the most difficult situation in a quarter of a century today by reason of the low prices for the commodities which they have produced for sale this year. It cannot be gainsaid that, when harvesting costs are paid, and when the farmer has taken care of his fuel and food requirements for this year, he will have relatively little left over for the payment of his debts.

That being the case, he should look to the future and take steps to protect his credit so that he may carry on till such time as prices return to normal and he is again able to meet all his obligations. If he fails to do this he may be forced to quit with a load of debt hanging over him, and with no other job in sight to which to turn his hand.

What should he do under the circumstances?

For one thing, he should place his cards on the table before his creditors. He should go to those whom he owes and whom he cannot pay, and should tell them his story frankly...

If farmers over Alberta will follow the plan of going to their creditors, showing them how much crop they have raised and what it will bring at present prices, we are quite sure that they will be well received. For there is no business concern in this part of the west which does not know that there is nothing more important than that the farmer should be allowed to remain on the land and raise crops until normal price conditions return.

No one wants to crowd the farmer off the land these days because of inability through no fault of his own to pay his debts. Our farmers have proven this year their ability to produce good crops, and continued production is the only way out of our present dilemma. But the farmers' creditors are entitled to such explanation of each man's position that they as business men, may be able to arrange their affairs so that they, too, may carry on and serve the farmers' needs. A little co-operation to this end will go a long way in carrying this farming community through the present unsettled period.—Lethbridge Herald.

A Vancouver newspaper estimates that every bushel exported through that port is worth ten cents to British Columbia, the money going to railway employees, employees of elevators, shipping and insurance firms, lumber companies, for lumber to line boats merchants and ship chandlers for stores, etc.

Prairie elevator companies are busy, oil companies have been encouraged by a larger demand for their products, banks are busier and so are lumber companies. Retail and wholesale business are doing a little better.

And in Eastern Canada where manufacturing for the West is largely done business is slowly beginning to show improvement. And the people are feeling more hopeful.

All this has been brought about because a quarter of a million grain growers on the Canadian prairies have, by their own industry and skill, and with the beneficial aid of Nature, produced a big crop of grain of splendid quality.

Nowhere else in the world is there a group of farmers of similar size who perform such prodigies of production, for in addition to this enormous production of wheat the production of oats has been estimated at 274,700,000 bushels, of barley 70,400,000 of rye 11,536,000 bushels and of flax 3,057,000. The total grain grain production of the prairie provinces of Canada is estimated at 805,688,000 bushels from 39,742,370 acres in crop.

Here in Alberta, if the government estimate is fulfilled, wheat growers will harvest 172 million bushels of wheat, an all-time record, 105,500,000 bushels of oats, 20 million bushels of barley and 3,673,000 bushels of rye.

Back on the farms Canada's No. 1 producer of wheat looks upon his year's work and calls it good and then looks at the price and thinks bitter thoughts. Thirty cents a bushel is all he gets for 1 Northern wheat, the best wheat in the world. Not much reward for the man who carries Canada on his back, this modern Atlas who holds up the Dominion's economic sky.

During the past couple of years it has been brought home to Canadians in every walk of life that this country cannot get back permanent prosperity until the farmer gets a fair recompense for the product of his labor. You can burn down every town or city of Canada and it will be rebuilt. Why? Because the farming industry needs that town or city. But destroy the farming industry, as present prices if long continued will inevitably accomplish, and what happens to the town or city? Grass will grow up between the streets.—Alberta Pool Bulletin.

NEW NORWAY J. A. BLACK, Manager

interest, which is far from the case in a majority of instances.

Average estimated expenses on a 480 acre farm using tractor and tractor implements:

400 acres in crop, all wheat, 80 acres for pasture, buildings and summer fallow.

Seed, 400 acres @ 1½ bu. to the acre, @ 40¢ per bus. \$240.00

Cash expense of sowing with disc combine, 25¢ per acre ... 100.00

Interest on machinery, \$3000 at 8%, tractor, separator, disc combine ..... 240.00

Payments or replacements on machinery at 10% per year ..... 300.00

Car license, gas and repairs 100.00

Life insurance and building insurance ..... 200.00

Doctor's bills, telephone, repairs for machinery ..... 150.00

Twine, 2½ lb. to acre, 1000 lbs at 8½¢ ..... 55.00

Stocking, 25¢ per acre, including board ..... 100.00

Gas and oil for tractor ..... 100.00

Taxes ..... 150.00

Grain hauling, 10,000 bus. @ 3¢ ..... 300.00

Hall insurance @ \$1 per acre ..... 400.00

Total ..... \$3155

Income:

10,000 bushels @ 25¢ bus. \$250.00

These figures allow nothing for the farmer for interest on his capital invested and no wages for the work he performs. The above figures, when subtracted, show a deficit of \$655. Also it is surmised that the farmer gets a crop every year, and also figures the cost on the basis of disc combining; whereas the farmer must plow or summerfallow, one year at least out of every three or four years, which is a costly process.

From the above figures it is easily seen that the western farmer is indeed living in a land of milk and honey, and that in order to keep going and pay his way, let alone pay back debts, he must be the greatest magician of all time. How long would organized labor stand for conditions similar to what the farmer is putting up with?

Seed, 50 acres wheat 1½ bushels to acre @ 40¢ ..... \$30.00

50 acres oats, 2½ bushels to acre @ 20¢ ..... 25.00

Twine, 2½ lbs. to acre, @ 5¢ ..... 21.50

Taxes ..... 50.00

Repairs ..... 25.00

Doctor's bills, telephone ..... 50.00

Hall insurance, \$1.00 per acre ..... 100.00

Threshing, oats 2500 bushels @ 3¢ ..... 75.00

Wheat 1250 bushels @ 5¢ ..... 62.50

Grain for feed, horses, cows hogs and chickens, 800 bushels @ 10¢ ..... 80.00

Life insurance and building insurance ..... 100.00

Car license gas and repairs 75.00

Machinery payments or replacements per year ..... 50.00

Total ..... \$744.00

Estimating the sixty remaining acres of hay and pasture to raise enough livestock, poultry, eggs, hogs and milk cows to pay grocery and clothing bills, incidentals, etc.

Income:

Oats, 50 bushels to acre 2500 bushels @ 10¢ bushel .. \$250.00

Wheat, 25 bushels to acre 1250 bushels @ 25¢ bushel .. \$312.50

Total ..... \$562.50

These figures allow nothing to the farmer for interest on the capital invested and no wages for doing the work of the farm which is all supposed to be done by the farmer himself, without a hired help.

The above figures when subtracted show a deficit of \$181.50, so the average western farmer on a 160 acre farm must certainly be living in a land of milk and honey. These figures also surmise that the farmer has his 160 acre farm free from debt or

the public like it (as apparently Mr. U.F.A. does); then admission to the pearly gates need hold no fear for him, for he is of certainty a combined politico financial wizard whom the Saviour needs watch.

J. E. Browne, or unseat Him at the right hand of God—evidently in the mind of "U.F.A.", a position John E. already merits—and his perpetual sanctimonious expression rather fits into the scheme, may I add.

Thank you Mr. Editor for your valuable space, I am, neither an "unknown author" nor a propagandist, but merely a much overburdened taxpayer like all other Albertans, and with little hope now of ever being otherwise.

### COMMUNICATION

[We do not necessarily endorse the sentiments advanced by this or any other correspondent under this heading.—Ed.]

Camrose, Alta., Sept. 30, 1932.

The Wetaskiwin Times,  
Wetaskiwin, Alberta.

Dear Sir:

The Camrose High School held their annual sports today, Sept. 30.

Believe it or not, two firsts and two second prizes were won by pupils in the same event. One boy was disqualified in the longer sprints for passing and flashing in front of his opponents, where no lanes were marked on the oval course.

A HIGH SCHOOL FAN.

P.S.: Is there any record in Canadian history where two firsts and two seconds were won in the same event?

Mundare, Alberta,  
Editor of Wetaskiwin Times,  
Wetaskiwin, Alberta.

Dear Sir:

We hasten to thank you for correcting Mr. R. M. McCool. We desire, however, a little more of your propounder's valuable space to put Mr. McCool in his proper place. He uses language, which in effect says I haven't told the truth; that I told half truths.

In the election figures I cited, I quoted from the Government Records. I have checked these again and find there is not a single error. If these figures do not tell the truth then the Government has issued false statements, wherein I cannot be blamed.

There is not one iota of propaganda in the article I wrote. It contains a correct recitation of figures plus

comment exaggerated not in the least.

We realize they were cold hard figures, but they were the Government's.

Quoting the figures of other constituents doesn't disprove anything we wrote; conversely, it proves our contention as to extravagance, even more fully than I proved the same. To lay the blame on Dr. J. Hunt is both absurd and gutless.

Let me remind Mr. McCool that the expression "half-truths" means nothing. A matter stated in figures is either the truth or not the truth. There is no halfway in figures. If my election figures are correct then what I wrote was the truth. Then in that case Mr. McCool (not I) comes squarely under that little appellation in English covered by a word of four letters: And may I add a couple of epithetic epithets of only three letters each to complete his description.

It may too interest Mr. McCool that the expression "half-truths" means nothing. A matter stated in figures is either the truth or not the truth. There is no halfway in figures. If my election figures are correct then what I wrote was the truth. Then in that case Mr. McCool (not I) comes squarely under that little appellation in English covered by a word of four letters: And may I add a couple of epithetic epithets of only three letters each to complete his description.

## SPORT

WETASKIWIN H.S. RUGBY  
TEAM DEFEATS LACOMBE

Wetaskiwin defeated Lacombe 28 to 8 at the Wetaskiwin Athletic Park on Friday, in one of the first rugby games of the early season.

The touchowns of the winning side were made by Bert Brown, Kenneth Kirstein and Stanley Shaw. The converts were ably taken by Ted Asp.

Lacombe's team put up a good fight, and the game was even till the last half.

The Wetaskiwin boys were coached by Mr. Farewell, and the game was refereed by Mr. Taylor and Mr. Laverty, the latter of Lacombe.

On this coming Friday another big game is being staged here at 2:30, and the boys promise to show you a good game against Red Deer.

**GEO. L. OWEN'S SALES**

WANTED—Fall plowing done. Apply A. McLean, Rideau Farm, south of Millet. 28-3tn

YANKEES WIN FOURTH GAME TO MAKE SWEEP OVER NATIONAL LEAGUE

Wrigley Field, Chicago, Oct. 2—In a rip-roaring climax that smashed the series records and blasted the last faint National League hopes to fragments the New York Yankees rode roughshod today to their third successive clean sweep in baseball's classic championship.

By the score-busting score of 13 to 6, the American League champions overpowered and routed the last vestiges of the defence of the Chicago Cubs. Five British pitchers failed in the last attempt to stop this steam roller as the Yankees bounded out their fourth successive victory, thereby running their unprecedented winning streak to an even dozen triumphs over the National League in the combined campaigns of 1927-32.

**CHICKEN SEASON OPENED SATURDAY**

Season for hunting prairie chickens and Hungarian partridge opened Saturday at daybreak.

North of Lacombe—Kerrobert branch of the Canadian Pacific railway and the Red Deer river, the prairie chicken region extends for the entire month of October, with a bag limit of five per day and 50 for the season. South of that line the season ends on October 15 where the bag limit is five per day and 25 for the season.

The Hungarian Partridge season extends to the end of November with a bag limit of 15 per day and 200 for the season. These regulations apply to both the south and north parts of the province.

**WEEKLY STOCK MARKET REPORT**

The following is a report from the Edmonton Stock Yards, as supplied to The Times for the week ending October 4th:

Receipts: Cattle, 441; Calves, 119; Hogs, 978; sheep, 787.

Receipts so far this week have really been insufficient to make or establish a market, and the bulk of the offerings consisted of stocker cattle. In spite of light receipts buyers are still showing an indifferent attitude and are lavish in their bidding, and close to their grading. Prices are holding fairly steady with last week's close. Plain heavy cattle are decidedly hard to move even at lower prices. Farmers would be well advised to keep back any cattle except those that show finish. The following are the prices:

RABBIT HILL COAL—Lump, \$6.50; Egg, \$5.50; Nut, \$4.50.

The analysis of this coal is as follows: Moisture content, 22.9; volatile matter, 30.3; fixed carbon, 42.4; ash, 4.4; BTU, 5,000 per cu. ft.; heating value in BTU per lb., 7,500.

## ALBERTA POSITION IN SEPT. 1932 IS MUCH IMPROVED

Alberta has, in September, 1932: A grain crop that will return the farmers about \$15,000,000 more than in 1931.

A fodder crop valuing \$5,000,000 more than last year.

Dairying industry worth \$12,000,000.

Poultry industry worth \$8,000,000.

Cattle marketing worth \$16,000,000.

A record-making crop of sugar-beets.

Fewer unemployed.

Drastic economies in governmental and municipal expenditures.

The prospect of improved markets as a result of the Imperial Economic Conference.

The support of a new spirit of confidence among its people and the indication of largely-improved world conditions from which it will be one of the first to benefit.

## BETRAYED BY FINGERPRINTS

Fingerprints that were ten years old recently caught up with Thomas McTyree. He had been arrested by Omaha police on a vagrancy charge. When his fingerprints were sent to Washington to be checked it was found that McTyree was wanted in Oregon, Mo., on a ten-year-old charge of robbing a hot car. Sheriff O. H. Abbott of Oregon called for McTyree to serve a prison term.

A high pressure salesman touring the town was discussing on the wide range of his product and its popularity. He said "We have letters of commendation from England, Australia, Brazil—We even got a postcard from Scotland."

NOT SEE TOO MUCH  
OFTEN THE BEST

A writer in the Christian Science Monitor, suggests that parents would often manage more wisely by "not seeing" a great many little encounters amongst children.

"When children are enjoying themselves in perfectly harmless ways, why should we always scold?"

"It like not to notice simple quarrels amongst children, because they have to learn how to get along together and be sportsmanlike. When grown-ups interfere little good is done."

"At meal time it is easiest to teach good mannered by being good-natured ourselves. We can remark about things in a kindly way, but we must be careful at meal times not to see too much, otherwise we spoil a child's meals. Tears during meals should be avoided. It seems so easy to make a child cry during meals. A fit of temper brought on by a remark which was not necessary, and the child refuses to eat. Then the whole house is troubled."

The mother who does not always see faults will manage her children better than the one who sees too much! Has your child helped you tidy the room? See the good she has done and be blind to those few places which she has overlooked. You, yourself must often miss a few places when you are dusting! If you do not, then you are a truly wonderful person!

"Children are different, not any two exactly the same. With some it pays to be short-sighted about one thing, with some about another. Children are well worth all the time and study we give to them. Mothers who do not see too much are loved by all others."

SEIZE 75,000 BUSHEL WHEAT  
FOR SIFTON M.D. TAX ARREARS

Provost, Sept. 30.—Sifton municipality has seized 75,000 bushels of wheat, thus clearing up tax arrears on 59 farms and an election contest now looms in one division, the first contest since 1913. It is stated that 85 per cent of all the tax arrears have been now cleaned up by seizures.

This municipality is now working to clear its records of all tax arrears and pressure is being brought to bear on all delinquents, which it is hoped will result in Sifton being enabled to start the new year with a clean sheet. In 1931 the tax rate dropped to seven mills and in 1932 to five and one half.

"If all tax arrears were in, the municipality would have enough to carry on for two years without further levy," stated one of the officials in an interview.

At the council meeting of Sifton, which will be held on Saturday, it is expected that definite arrangements will be made for the filling of the vacancy on the board, caused by the death of Councillor John Kirkpatrick, representative of division four.

Keen interest is being taken in the choice of a successor to Councillor Kirkpatrick, who had served the district efficiently for the past six years. More than one nomination is in prospect, and the election which is confidently predicted, will be the first to be held in that district during the past 14 years.

## 1,233 ENROL AT VARSITY

Edmonton, Sept. 30.—Student registration at the University of Alberta reached 1,233 Thursday night, according to figures compiled by A. E. Ottewell, university registrar. The total at the corresponding day last year was 1,153.

Declaring that it is difficult to make a definite forecast at this time, Mr. Ottewell said that the figures indicate a probable slight increase in the total enrolment at the university this year, over the 1931-32 school year totals.

Classes at the institution are now under way.

GOVERNMENT CONDUCTS  
ECONOMIC SURVEY

Edmonton Sept. 30.—As thorough a canvass as possible of every section of the province is being made by the government, it was stated by Premier Brownlee, in order to find exactly what were the prevailing conditions. The government was also endeavoring to get the close cooperation of the creditor interests in meeting the situation already known to exist, and likely to be revealed by the inquiries under way.

The premier again disavowed completely the inference that had been drawn in some quarters from his recent board of trade address in Calgary, to the effect that he had made a threat of a moratorium on debts.

"I want to say very definitely that I made no such threat," Mr. Brownlee remarked, in an interview Thursday, "and I do not believe that I was so interpreted by a majority of those who heard my address. I did emphasize, however, what is undoubtedly true: that with the price of wheat at the low level of the past two or three years, and still prevailing, this is becoming more and more one of the most urgent problems that we have to face. Without question, it must be given the most serious attention at the next session."

In saying that it is an extremely serious and urgent question," the premier added, "I have received complete endorsement from some of the largest and best reputed creditor interests in the province. The government is giving the matter its most earnest consideration and will move along the lines that it considers in the best interest of the province at large. Any widespread discussion of a moratorium, however, is not made necessary by anything I have so far said."

## BE READY!

Though business right now may be just a bit slack,

The days of good business are sure to come back!

But whining and growling at things that are wrong,

And spreading dark rumors, won't help things along.

It's no time for quitters whose courage is slight,

But action is needed—the fighters will fight.

And those who are twiddling their thumbs while they wait,

For times to get better—will lose—sure as fate!

THE FLIES UPON MY DEAR  
OLD GRANDDAD'S FARM

If there's any truth in science and it isn't full of lies,

Then this theory about the "bugs" upon the backs of flies,

Should have killed ten million people and caused untold loads of harm,

By the way they used to gather down upon my granddad's farm.

For when I went there in summer, gee, the way those flies would light

On the table cloth at meal times say,

It was a holy fright;

They would settle into everything we'd eat, but no alarm

Would be felt by anybody down upon my granddad's farm.

My aunt Mary'd cut a bough from off the tree out by the seat,

She would stand and swish those flies away while we would try to eat;

They would light upon the butter, on your face and on your arm,

They were like the sand for numbers down upon my granddad's farm.

In the cellar there were thousands, in the milkhouse there were more,

They were black o'er all the ceiling,

On the walls and on the floor;

They were no screen doors to stop them, swatting hadn't come to charm.

Anybody who was living down upon my granddad's farm,

Now had these flies' those disease germs covering them from head to toe,

Why the people in that section would have all died years ago;

For there were ten thousand million buzzin' 'round, but nary harm;

Ever came to anybody down upon my granddad's farm.

Yes, my granddad was a hundred and my grandma ninety-four;

When they both died, just of old age, nothing less and nothing more;

So if there were any truth in this disease-germ fly alarm,

They'd have died when they were twenty, down upon my granddad's farm.

RALPH GORDON in Toronto Star.

BLIND BAGGAGE TRANSPORT  
IS NEAR ITS END

Calgary, Sept. 29.—Thousands of harvest hands are reported leaving Alberta harvest fields in an effort to secure free transportation home before the Dominion government's ban on freight-train riding goes into effect September 30. The harvest hands are reported trekking into Calgary and Edmonton, hoping to obtain rides to their hometown via the "roads" before the ban ends the hobo style of travelling.

From a number of farming districts came reports that the harvesters are deserting the fields in large numbers declaring they are seeking "some good spot for the winter before the bulls stop us from travelling." Some of the men are bound to their homes in Eastern Canada, several arriving in Calgary declaring their homes to be in Prince Edward Island.

The majority of the harvesters arrived in Calgary this week. They maintain they have insufficient funds to purchase transportation home because of the small wages paid in the harvest fields this season.

Vancouver, Sept. 30.—Canned salmon pack in British Columbia to date totals 49,211 cases, compared with \$45,015 for the corresponding period last year, according to a statement issued by Major J. A. Motherwell, chief supervisor of fisheries.

Brantford, Ont., Sept. 30.—Enrolled as pupils for the Ontario school for the blind, a group of children arrived in Brantford from Alberta and Saskatchewan points. Occupying two cars, the children were escorted here by members of the school from Edmonton, Regina and Winnipeg, the three western assembly points.

## THE BULL IS DANGEROUS

Beware of the bull, say experienced cattle men.

"Trampled by bull, seriously injured" is becoming altogether too frequent, believes the provincial dairy branch. The fact that there have been a score of accidents chargeable to herd sires on Alberta farms during the past year, with about half that number of deaths, resulting, should warn Alberta dairymen of the dangers of improperly handling their bulls.

Local papers are carrying an increasing number of stories of drivers who are either killed or seriously injured by a sudden attack from the dairy sire and with the increase in the number of such animals in the province the danger is being greatly increased.

There is a safe rule that says that no dairy bull is to be trusted, and that is the only one that should be followed in the handling of these animals.

It is not always the cross, ill-tempered animal that breaks into the headlines after one of these attacks; as often as not the stories convey the words that "the attack was entirely unexpected as the animal had never been the least inclined to be cross."

Dairymen should remember that they are handling animals of a highly nervous temperament, which naturally puts them in a different class than the more placid beef breeds.

Every dairy sire in Alberta should be provided with a solidly-constructed corral with a small shelter attached. These need not be expensive—a good many Alberta farms have them already, constructed of the most readily available materials. The main thing is that they be strong; poles are as suitable as plank when they

## For All Who Prefer Quality

**"SALADA"**  
TEA  
"Fresh from the Gardens"

can be secured near at hand, and safety bull pens should be strengthened by welded posts.

If a small breeding pen or rack is included in the plan, the sires may spend all his days of service on the farm in this corral with no danger to anyone. Not only is he being provided with a place where he may secure the exercise which is necessary to keep him in good breeding condition.

There is nothing to fear from the dairy sire if he is properly handled in this manner. An ounce of prevention in the form of such a corral will mean the saving of a dawn and were picked up two hours later by the government patrol boat, Mrs. Morris Rudolph, Barron's River Station, N.S., who was returning from a walk turned to bronchitis. Nothing seemed to help me until I got Dr. Wood's Norway Pine Syrup. I found the phlegm was brought up without any hacking coughing, and after using three bottles I was relieved of my bronchitis.

That was five years ago, and I have not been troubled with it since." Price 35¢ a bottle; large family size 85¢; at all drug and grocery stores; sent up only by The T. Milburn Co., Limited, Toronto, Ont.

Bothered With Bad Cough  
It Turned to Bronchitis

Mrs. Morris Rudolph, Barron's River Station, N.S., who was returning from a walk turned to bronchitis. Nothing seemed to help me until I got Dr. Wood's Norway Pine Syrup. I found the phlegm was brought up without any hacking coughing, and after using three bottles I was relieved of my bronchitis.

That was five years ago, and I have not been troubled with it since.
